

Packing blankets and ratchet straps are provided and shown in the photos. Please use packing blankets to protect the exhibits, especially the pine display crates, from excessive wear. The floor of the vehicle should be covered with Masonite, plywood, or clean cardboard to protect the exhibits.

Loading Order

- Start with the crates behind the seats
- Add the crates along the left wall
- Add the tables
- Blanket the crates as you place them
- Add remaining crates on first tier
- Move onto second tier

Diagram 1: Crates packed on the floor of the van.

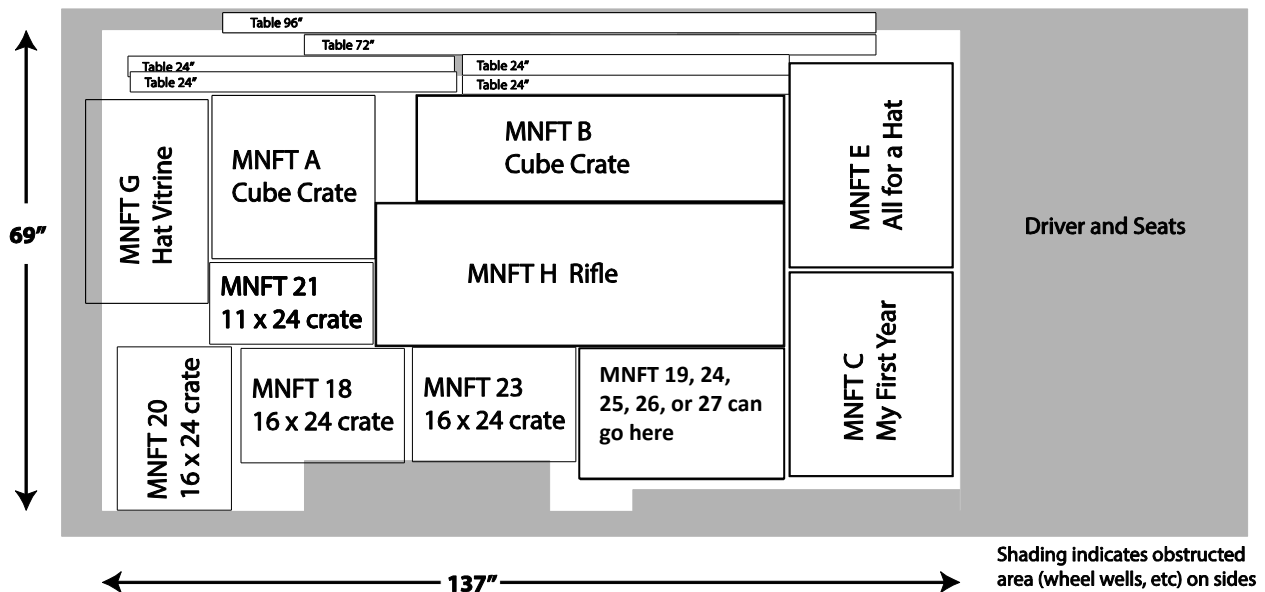

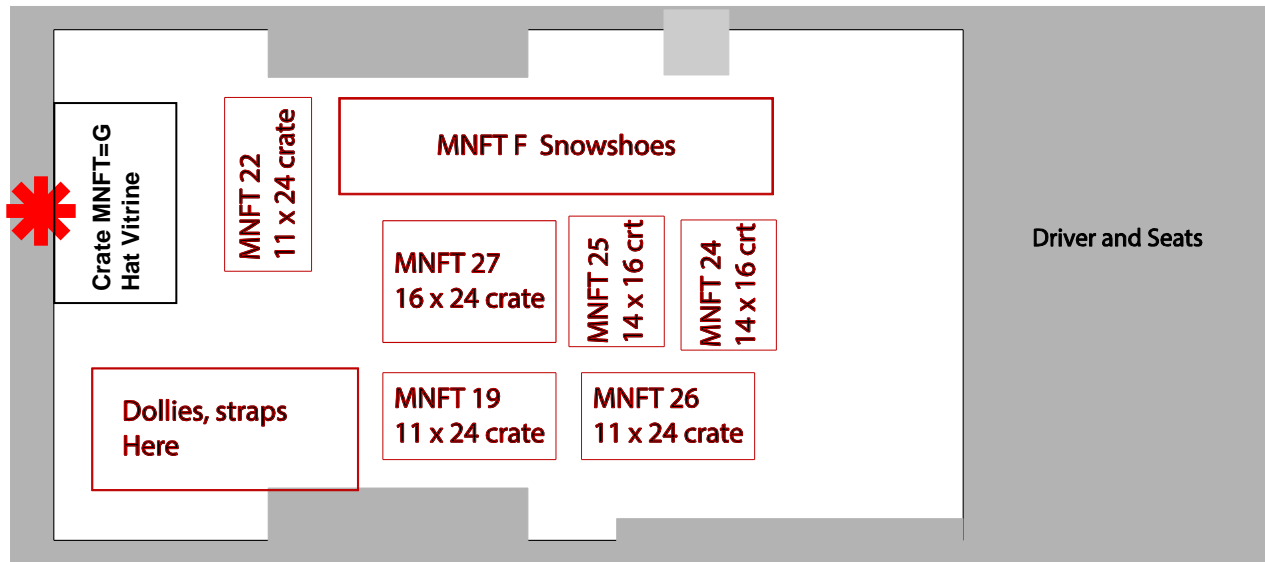

Diagram 2: Second layer of crates and materials, with packing blankets

*** Crate MNFT=G, The Beaver Hat Vitrine, is fragile.** Please ensure the beaver hat vitrine is well positioned, padded, and protected from things falling on it, the door slamming on it, etc. Do not kneel on the crate or set things on top. Please identify as FRAGILE (write on the blanket or add a sign) so the unloaders are aware.

Shading indicates obstructed area on sides

The Beaver Hat vitrine is now crated but still fragile especially in cold weather. It should not be stacked.
